Margerison-McCann Team Leadership Preferences

CAVEATS

You are a lot more complex and nuanced that any profile can capture

There is no correlation between your leadership preferences and performance in role

Whilst you have preferences you deploy or rely on delegated leadership in all of the segments

We'll explore your major and related role preferences – and we'll be careful not to stereotype

The collective picture as a team is often a helpful means to build further self and team awareness

3

Magerison McCann Profile

- Share your reflections on your personal profile
- What resonated most?
- What are your reflections on the areas of strength your report highlighted?
