Vision 2028

Vision	Pioneers of future careers and sustainable innovation for a changing world			
Drivers of change	Talent and innovation needs of industrial revolution(s) and barriers to access	Addressing health and economic inequalities: prior learning and social barriers, mental health	Challenging narrow proxies of talent and unequal access to social capital	Confronting unequal representation, structural bias, and barriers to access
Strategic objectives	Future Graduate	Future Professional	Future Life	Sustainable Future
Strategies	Education and Experience	Careers and Enterprise	Impact and Innovation	Sustainable Growth and Diversification

Vision 2028 is the University of East London's **innovative 10-year strategic plan.**

Launched in February 2019, it **articulates our goals for the future**, setting out how we will extend our reach and significance in the communities we serve, and **providing a route map towards our ambitious destination.**

Cross-cutting priorities	Sustainable 5.0 Economy
	Social Justice
	Health Gain and Wellness
	Glocal Anchor
Purpose	Addressing health and economic inequalities wherever they are found, we exist to enhance lives and enrich futures for a green and healthy world.
Mission	Preparing our students for the careers and opportunities of the future while driving forward that future inclusively and sustainably.

Our impact so far

- In 2024, the total output generated in the UK by the University together with the spending of our students came to £1.17 billion.
- Around 13,275 jobs across the UK are dependent on the University and its students.
- UEL is a major export earner for the UK, attracting over 11,500 students into Newham from countries around the world.
- Nearly 3 jobs in the UK are generated for every 5 international students at UEL, with 1 of those jobs being in East London.

Our impact so far

A New Engine of Inclusive Enterprise

- UEL is the UK's largest, fastest mover in new business growth, now ranked 2nd in the UK for student start-ups, having surged from 90th in just a few years.
- Even more remarkably, the number of UEL-backed firms still trading after three years has increased by over 1,000%.
- No other UK university has made such a rapid or lasting impact in inclusive enterprise and entrepreneurship.

Year of Health

Our impact so far

Graduate Success, Transformed

- UEL has achieved the largest, fastest improvement in graduate outcomes in the UK, increasing the number of graduates in meaningful work or study by 25% in just six years.
- Every programme, partnership, and initiative is designed to drive graduate success and close the skills gaps faced by communities and industry.
- This is the careers-first university – where employability isn't a siloed concept serving the few, but an active commitment developing inclusive talent for the global 5.0 economy.

The challenges we face…

East London is at the sharp end of a national public health crisis

- Healthy life expectancy in Newham is over a decade lower than elsewhere in the capital, with the **2nd lowest healthy life expectancy for males in London**
- North-east London has the **highest number of patients per GP in London**
- Nearly 20% of children in east London aged 2 to 2 and a half years old are **below their expected level of development**
- In 2017, seven out of every 100 deaths in Newham residents aged over 30 were **linked to long-term exposure to air pollution**
- Newham has the **2nd highest child poverty rate in the country**, and the highest level of families living in temporary accommodation

The solutions we create…

Institute for the Science of Early Years – Helping us understand how babies and young children think, learn and behave

Practice-Based Centres – Meeting local need while providing training opportunities for our students, in areas such as Law, Business, and Health

Child Online Harms Policy Think Tank – Working at the forefront of digital safety research, tackling issues from child exploitation to AI-powered misinformation

10

University of East London

Year of Health

The solutions we create…

Hospital and Primary Care Training Hub - European first in end-to-end simulated health and social care practice, the result of over £10m worth of investment from the Office for Students and UEL

Royal Docks Centre for Sustainability – Supporting a more sustainable and resilient future for businesses, students and residents in the Royal Docks area.

Stratford Health Campus – A campus dedicated entirely to medical care, training, research, innovation, and outreach, providing healthcare education on a site specifically setup to equip students for careers in the NHS.

UEL Global Campus Structure

12

University of East London

Year of Health

Developing the Global Campus

- The Global Campus must drive Vision 2028's ambition for careers-first education, industry integration, and global employability.
- On-the-ground presence is critical for building market-responsive education and employer networks.
- Future hubs must be scalable, financially sustainable, and aligned with local market needs.
- Strengthening alumni networks will reinforce global engagement and lifelong learning opportunities.

Metropolitan College Partnership

- UEL is the **largest Transnational Education (TNE) provider in Europe under its partnership with Metropolitan College** (MC) **in Greece**, reflecting a shared dedication to broadening educational horizons and fostering international academic collaboration.

- The partnership was **established in 2011,** significantly enhancing TNE opportunities for students in Greece. The collaboration offers Greek and international students access to UK-accredited degrees and professional qualifications, **supporting educational and economic growth in Greece.**

- The partnership has expanded to offer **over 50 courses** in both English and Greek across multiple campuses, serving **over 6,000 students**.
